CONTROLLER

The Army has the Green Berets. The Navy has their Seals. But for chopper pilots, only the best qualify for the STEEL TALONS™.

And this is your chance to prove that you belong. Based on (and remarkably faithful to) one of the most popular arcade hits of the last several years, *Steel Talons*™ puts you through 14 demanding combat missions through fog, haze, darkness, and smoke over 3D-scrolling desert, woodlands, and mountains. You've got a few things going for you, like the most advanced chopper taxpayer money can buy: 3380 shaft horsepower with four-blade articulated rotor, boron carbide armor, doppler radar. And then there's some of the most destructive weaponry in the air: hellfire missiles and a 30mm chain cannon. But it could all be just scrap metal - unless you've got what it takes to be a STEEL TALON™.

OBJECT OF THE GAME

You are a member of the elite STEEL TALONS™ squadron of helicopter pilots. Your job is to fly your state-of-the-art attack chopper through 12 grueling combat missions and a final Expert Mission (plus a Training Mission, if you want to practice a little first). The combat missions demand that you destroy air and ground targets as indicated in the orders given by your CO before each mission. Use either your hellfire missiles or your 30mm chain cannon to destroy targets. You also must maintain precise flying performance to avoid enemy fire, crashing your chopper, running out of fuel, or exceeding the time allotted for each mission. If you destroy all specified targets, do not crash, and complete your mission within the prescribed time limit, you will qualify for the next mission. Starting with the completion of Combat Mission 2, passwords are issued at the end of each successful mission that enable you to go directly to the next mission even if you have turned off your Super NES.

Here are some general guidelines.

- ➔ You must destroy all targets that appear on the Map to complete a mission (except for the Canyon Races, which have no targets).
- ➔ You have a limited amount of time and fuel to complete each mission.
- ➔ Successful missions earn bonus points and, starting with Mission 2, passwords that let you skip previously-completed missions the next time you play.
- ➔ Hits by enemy fire deplete your fuel supply quickly (much faster than flying does).
- ➔ Crashes caused by poor navigation rather than running out of fuel deplete your fuel supply.
- ➔ The game ends when you run out of fuel and crash as a result.

Now let's see some excellent flying.

GETTING STARTED

1. Place the *STEEL TALON*TM Game Pak into your Super NES and turn on the unit. The title screen appears.

2. Press **START** (or any other button) to continue to the **OPTIONS** screen. If you don't press a button within a few seconds, the game goes into "attract mode," which shows, in sequence, the game's story line, a list of the "Top Sticks" (high scores), and a flight demo. To exit attract mode, press **START** (or any other button).

3. Next, the **OPTIONS** screen appears, which includes a graphic of your chopper with call-outs of some of its specifications. Use **Left** and **Right** on the Control Pad to highlight **NO** or **YES** for the **2-PLAYER** option, then press **START** (or the **A Button**) when the

flashing white box highlights your choice. In the same manner, highlight and select either NO or YES for the SPEED-SET option and the REAL-MODE option. See the section entitled *Options Screen* for more details about these options.

4. After you've made your final selection on the OPTIONS screen, the COMBAT MISSION screen appears. Press **Left** or **Right** on the Control Pad (or use **SELECT**) to toggle through information about each of the 12 Combat Missions, the Training Mission, and the Expert Mission. Press **START** (or the **A Button**) to select the mission you want to try when it appears on the screen.

Note: Missions 3 through 12 and the Expert Mission require a password, which is given at the end of a successful mission (starting with completion of Mission 2).

5. When you select Mission 3 or higher, a password input field appears on the screen. To enter a password, press **Up** or **Down** on the Control Pad to cycle through the characters until the correct character appears in the field. Then press **Left** or **Right** on the Control Pad (or **SELECT**) to move on to the next field and repeat the process. When you have entered the correct character for all eight input fields, press **START** (or the **A Button**) to continue. If you enter a correct password, the mission begins. If you enter an incorrect password, the **REQUIRES PASSWORD** prompt reappears on the screen.

OPTIONS SCREEN

The choices on the Options screen are explained below.

2-PLAYER Choose between a one-player or a two-player game. In a two-player game, Player 1 (Controller 1) is the pilot and Player 2 (Controller 2) is the gunner.

SPEED-SET If you select YES, throttle "cruise control" is in effect. This means that your airspeed is maintained without pressing **Up** on the Control Pad, much like taking your foot off the gas pedal in a car with cruise control set. To change the speed, simply press **Up** or **Down** on the Control Pad as needed. If you select NO, you will lose airspeed as soon as you stop pressing **Up** on the Control Pad.

REAL-MODE When you select YES, real helicopter flight mode goes into effect. This means that the heading, pitch, and bank of the 3D view will rotate as you maneuver your chopper. If you select NO, the horizon remains steady while you maneuver. There are some rewards for using REAL-MODE, which adds difficulty to the game. In REAL-MODE, you'll get higher point rewards, extra fuel, and longer qualifying times.

CONTROLLER FUNCTIONS DURING A GAME

Even though you've got an intricate, complicated, state-of-the-art attack chopper at your fingertips, we've kept the controls simple. On the Control Pad of Controller 1, **Up** and **Down** increase and decrease speed while **Left** and **Right** handle turns. If you have SPEED-SET turned off and you want to turn while maintaining airspeed, just press **Up** and **Left** or **Up** and **Right** (diagonals). Use the **Left** and **Right Buttons** to spin the chopper quickly. The **A Button** fires missiles, the **B Button** fires the machine guns, and the **X** and **Y Buttons** handle altitude increases and decreases. Controller 2 takes care of gunnery controls in a two-player game as shown below.

CONTROLLER 1 (PILOT)

Up	Increase speed
Down	Decrease speed
Left	Turn left
Right	Turn right
A Button	Fire missile
B Button	Fire 30mm cannons
X Button	Increase altitude
Y Button	Decrease altitude
LEFT Button	Spin chopper left
RIGHT Button	Spin chopper right
SELECT	Toggle view either inside or behind chopper
START	Pause

CONTROLLER 2 (GUNNER)

Up	Move targeting crosshair up
Down	Move targeting crosshair down
Left	Move targeting crosshair left
Right	Move targeting crosshair right
A Button	Fire missile
B Button	Fire 30mm cannons
X Button	Increase altitude
Y Button	Decrease altitude
SELECT	Toggle view either inside or behind chopper

ON-SCREEN DISPLAYS

Know your instrument panel! If you don't pay attention to it, you'll waste lots of time and fuel flying around in circles. Don't forget, the object of the game is to locate and destroy enemy targets *efficiently*, because you have to conserve fuel and beat the clock in order to complete a mission successfully. An explanation follows of everything on your instrument panel, as well as other signals and indicators that appear in the 3D view.

MAP

Your location in the three-dimensional world is displayed on the map located in the center of the cockpit. The arrow is your helicopter's position, and the direction the arrow points shows your direction of travel. Enemy targets appear as yellow dots on the map. When an enemy target is within firing range and you are locked onto it, the map view changes to a closeup of the target in range.

RADAR

Close up radar is located on the right side of the cockpit. Yellow dots within the "V"-shaped lines represent targets that are in front of you and within range of your weapons. In addition, the "ENEMY" indicator above the word "RADAR" will flash and a pulsating sound will be audible when an enemy target is in range of your weapons.

LOCK-ON

When you're close enough to fire at an enemy target, a red "lock-on" indicator with crosshairs surrounds the target and an audible tone sounds continuously as long as the target remains locked-on. Fire missiles only when locked-on or you'll waste your ammunition (cannons, by contrast, have unlimited ammo).

COMPASS

Your heading is indicated at the top of the screen with the letters "N," "S," "E," and "W" to represent north, south, east, and west. The numbers in this display represent the degrees on a compass for northeast (45 degrees), southeast (135 degrees), southwest (225 degrees), and northwest (315 degrees).

HORIZON

This indicator, located at the top, left-hand side of the instrument panel, tells you whether you're flying level (crosshair centered), turning (crosshair toward the left or the right in the direction you are turning), flying forward (crosshair up), or flying backward (crosshair down).

COLLISION

Located above your score on the instrument panel, the collision indicator flashes when you're about to crash into something (such as a mountain or the ground).

TIME

The digital time counter indicates how much time you have used up during the mission.

SCORE

You earn points for destroying targets. Your current score is shown on the score counter located above the time counter.

TARGETS

The number of targets remaining to be destroyed in order to complete your mission is shown above the map.

REFUELS/FUEL

The refuel counter tells you how many refuels remain, and the vertical gauge beneath the counter shows you how much fuel is left before you use up one refuel. The counter decrements every time the gauge hits bottom. Whenever you're hit by enemy fire or crash, you lose fuel. Of course, you also use up fuel just by flying around.

MISSILES

You have an unlimited supply of cannon ammunition, but you have a limited supply of missiles, and the number of missiles you have left is shown on the missile counter.

ENEMY

The enemy warning indicator (above the radar screen) lights up as an enemy target moves within weapon range.

AIRSPEED

Obviously, the airspeed gauge tells you how fast your chopper is moving.

ALTITUDE

Pay occasional attention to the altimeter (which shows your altitude) to avoid unexpected collisions with the ground. You need to watch it more carefully if you have REAL MODE set to "ON."

TURN

If an enemy fires at you while outside your 3D field of view, an arrow with the word "TURN" on it appears on the screen to point you in the direction of the enemy so that you can destroy it before it blasts all of your fuel away!

ENEMIES

You'll encounter a wide variety of enemies and targets, both on the ground and in the air. You'll save yourself a lot of trouble if you destroy jet aircraft while they are still on the ground. In several missions, the fighters don't take off right away, and if you get to them quickly enough, you can take them out while they're still on the runway. Also, remember that you always have more targets to destroy than you have missiles to destroy them, so you'll have to use your cannons to knock out some of the targets. A word to the wise: use the cannons to destroy targets that don't fight back, like trucks, fuel storage tanks, and storage buildings. It takes considerably longer to take out a target with the cannons than it does with the missiles. You could lose a lot of fuel if you have to use the cannons to destroy firing enemies such as tanks, armoured off-road vehicles, anti-aircraft embankments, jet aircraft, or attack choppers.

MISSIONS

There are a total of 14 missions in the game: one TRAINING mission, 12 COMBAT missions, and one EXPERT mission. Your goal in each mission is to destroy every target on the map within the time limit prescribed, except for the Training mission, Combat Mission 3, and Combat Mission 8, which require flying precision rather than target destruction. A brief description of each mission follows. NOTE: If you have REAL MODE turned on, you get one additional minute to complete a mission than the time indicated in the following mission briefs, as well as one additional refuel. In addition you'll get twice as many points for target-destruction and mission bonuses.

MISSILES	2
TIME TO BEAT	2:45

Note: The EXPERT mission must be completed five times to become a *Steel Talon™*.

TOP STICKS

If your score is among the top 10 when your game is over, we're happy for you! Enter your name on the "Top Sticks" high-score screen. To enter your name, press **Left** or **Right** on the Control Pad to highlight the character you want to enter, then press the **A Button**. Repeat this process until your name is complete, then highlight **END** and press the **A Button**. To erase a character and go back a space, highlight "<" and press the **A Button**.

Here is how scoring works:

ACHIEVEMENT/POINTS

- FLY THROUGH RINGS (TRAINING) 100
- TARGETS DESTROYED BY CANNON 250
- TARGETS DESTROYED BY MISSILE 500
- PASS MISSION 1000
- ACE MISSION 5000

In order to "ACE" a mission, you must beat the "PASS" time by 15 seconds or more, except for Mission 12, in which you must beat the "PASS" time by 30 seconds or more.

If you have REAL MODE turned on, you'll get twice the number of target-destruction and mission-bonus points indicated above. However, flying through rings is worth only 100 points whether REAL MODE is turned on or not.

GAME HINTS

- If you're spinning more or less out of control, first press **Down** on the Control Pad to bring the chopper's forward motion to a halt.
- Beware of the tendency to over-compensate in the opposite direction when you find yourself turning too far in one direction.
- A series of short, light taps on the Control Pad will keep steering under better control than if you press and hold the Control Pad.
- When you need to make an abrupt turn, use the **Left** and **Right Buttons**. This makes your chopper far more maneuverable for attacking purposes or while you're under attack, and it also saves you time and fuel. (This technique is especially helpful both in the canyon races and when attempting to shoot down an airborne jet.)

Watch your speed while approaching a target to avoid overflying it.

If you do go past a target, you can press **Down** on the Control Pad to reverse the direction of the chopper and bring the target back into sight. This isn't such a good idea, however, if you're under heavy fire, as you will lose too much fuel from enemy hits.

Destroy targets quickly (missiles are far more efficient than the

machine guns) once you have them "locked on" to cut down fuel loss from enemy hits.

- Don't waste your missiles on targets that don't fire back at you. Use your cannons (which take longer to destroy targets than missiles do) to destroy these targets instead. Use missiles to destroy targets that fire back at you. Don't forget, every time you're hit by enemy fire, you lose precious fuel.

TAKING CARE OF YOUR LEFT FIELD ENTERTAINMENT GAME

- This Left Field Entertainment Game Pak is a precision-crafted device with complex electronic circuitry. Avoid subjecting it to undue shock or extremes of temperature. Never attempt to open or dismantle the Game Pak.
- Do not touch the terminal leads or allow them to come into contact with water or the game circuitry will be damaged.
- Always make sure your Super NES Control Deck is SWITCHED OFF when inserting the Game Pak or removing it from the Super NES Control Deck.

COMPLIANCE WITH FCC REGULATIONS

This equipment generates and uses radio frequency energy and if not installed and used properly, that is, in strict accordance with the manufacturer's instructions, may cause interference to radio and television reception. It has been type tested and found to comply with the limits for a Class B computing device in accordance with the specifications in Subpart J of Part 15 of FCC Rules, which are designed to provide reasonable protection against such interference in a residential installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient the receiving antenna
- Relocate the Super NES with respect to the receiver
- Move the Super NES away from the receiver
- Plug the Super NES into a different outlet so that computer and receiver are on different circuits

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet prepared by the Federal Communications Commission helpful: *How to Identify and Resolve Radio/TV Interference Problems*. This booklet is available from the U. S. Government Printing Office, Washington, DC 20402. Stock No. 004-000-00345-4.

LEFT FIELD ENTERTAINMENT LIMITED WARRANTY

Left Field Entertainment warrants to the original purchaser of this Left Field Entertainment software product that the recording medium on which the Game Pak is recorded will be free from defects in material and workmanship for ninety (90) days from the date of purchase. Defective media returned by the purchaser during the ninety (90) day period will be replaced without charge, provided that the returned media have not been subjected to misuse, damage, or excessive wear.

Return defective media to point of purchase. You must include a dated proof of purchase, a brief statement describing the defect, and your return address. Left Field Entertainment does not warrant that the Game Pak will meet the purchaser's specific requirements. ANY STATEMENTS MADE CONCERNING THE UTILITY OF THE GAME PAK ARE NOT TO BE CONSTRUED AS EXPRESS OR IMPLIED WARRANTIES.

THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES, WHETHER ORAL OR WRITTEN, EXPRESS OR IMPLIED. ANY IMPLIED WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE EXCLUDED. IN NO EVENT WILL LEFT FIELD ENTERTAINMENT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY KIND IN CONNECTION WITH THE GAME PAK.

Some states do not allow the exclusion or limitation of incidental or consequential damages or limitations on how long an implied warranty lasts, so the above limitation or exclusion may not apply to you. This warranty gives you specific rights, and you may also have other rights which vary from state to state. Address all correspondence to:
